UID EX - 8 WIREFRAME USING BALSAMIQ

AIM

To design a simple web application wireframe for an event management system called **EventEase** using a UI design tool.

OBJECTIVE

- To create a basic UI for event browsing and booking
- To design screens with clear navigation and user-friendly layout
- To represent user interaction flow using a storyboard

TOOLS USED

- Balsamiq Wireframes

DESCRIPTION

EventEase is an event management platform that helps users:

- Browse upcoming events
- Book and manage event registrations
- View event details and schedules

The wireframe is designed in a simple and minimal layout with UI components such as buttons, cards, forms, and navigation menus.

SCREENS INCLUDED

1. Home Page
○ Displays featured and upcoming events
○ Navigation bar with categories

2. Event Details Page
○ Shows event description, date, time, and venue
○ Booking option available

3. Booking Page
○ User enters details (name, seats, etc.)
○ Confirm booking button

4. Dashboard Page
○ Displays user's booked events
○ Option to manage or cancel bookings

5. Settings Page
○ User preferences and basic profile options

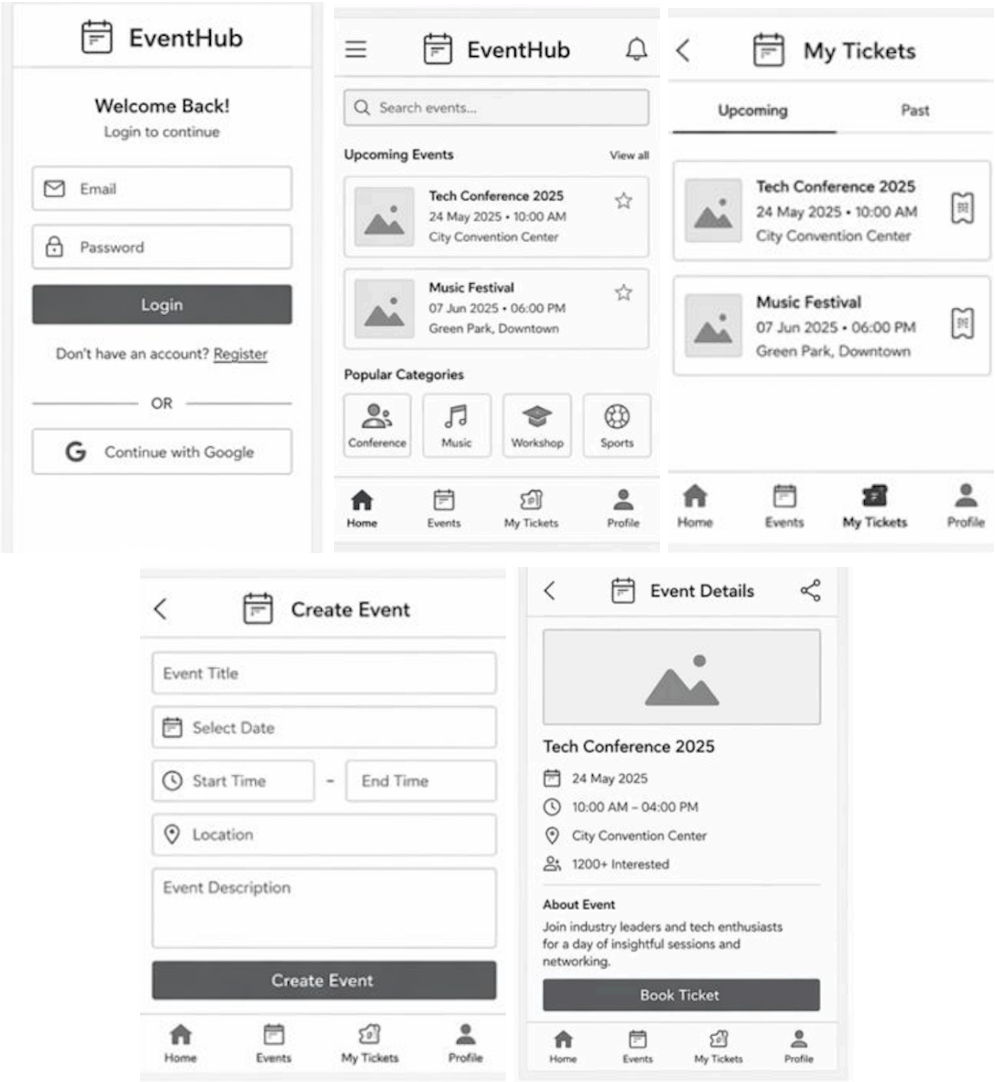
USER FLOW

Home → Event Details → Booking → Dashboard → Settings

Arrows are used in the storyboard to show this flow.

FEATURES

- Simple and clean UI design
- Easy navigation between pages
- Event browsing and booking system
- User dashboard for managing events



RESULT

The EventEase wireframe provides a clear structure for an event management system with simple navigation.

It ensures a user-friendly experience for browsing and booking events efficiently.
