EXPERIMENT 10 : EVENT MANAGEMENT DATA VISUALIZATION

AIM:

To create data visualizations such as pie charts and bar graphs to analyze event participation and categories using JavaScript and Chart.js.

OBJECTIVE:

- To understand data visualization techniques
- To represent event data using charts
- To use Chart.js for creating interactive graphs
- To display values inside a pie chart

INTRODUCTION:

Data Visualization is the graphical representation of data using charts and graphs. In this experiment, an **event management system (EventEase)** is used to visualize event-related data such as participation in different categories like Conferences, Music Events, Workshops, Sports, and Others.

PROCEDURE:

Step 1: Create HTML File (index.html)

- Create a basic HTML structure
- Add canvas elements for charts
- Include Chart.js and datalabels plugin

Step 2: Create JavaScript File (script.js)

- Define event data
- Configure pie chart with values inside
- Configure bar chart

Step 3: Run the Project

- Open index.html in a browser

CODE:

index.html

```
<!DOCTYPE html>

<html lang="en">

<head>

   <meta charset="UTF-8">

   <meta name="viewport" content="width=device-width, initial-scale=1.0">

   <title>BeatFlow Music Visualization</title>

   <script src="https://cdn.jsdelivr.net/npm/chart.js"></script>

   <script
src="https://cdn.jsdelivr.net/npm/chartjs-plugin-datalabels"></script>

   <style>

       * {

           margin: 0;

           padding: 0;

           box-sizing: border-box;

       }

       body {

           font-family: -apple-system, BlinkMacSystemFont, 'Segoe UI', Roboto,

    <script src="script.js"></script>
</body>
</html>
```

script.js

```
// Pie Chart (Genre Distribution)

const pieData = {

   labels: ['Pop', 'Rock', 'Hip-Hop', 'Classical', 'EDM'],

   datasets: [{

       data: [30, 20, 25, 10, 15],

       backgroundColor: [

           '#FF6384',

           '#36A2EB',

           '#FFCE56',

           '#4BC0C0',

           '#9966FF'

       ]

   }]

};

new Chart(document.getElementById('pieChart'), {

   type: 'pie',

   data: pieData,

   plugins: [ChartDataLabels],

   options: {

       responsive: true,

       maintainAspectRatio: false,

       plugins: {

           datalabels: {

               color: '#fff',
```

```
                font: {
                    weight: 'bold'
                }
            }
        }
    }
});

// Bar Chart (Listening Frequency)
const barData = {
    labels: ['Pop', 'Rock', 'Hip-Hop', 'Classical', 'EDM'],
    datasets: [{
        label: 'Hours Listened',
        data: [15, 10, 12, 5, 8],
        backgroundColor: '#36A2EB'
    }]
};

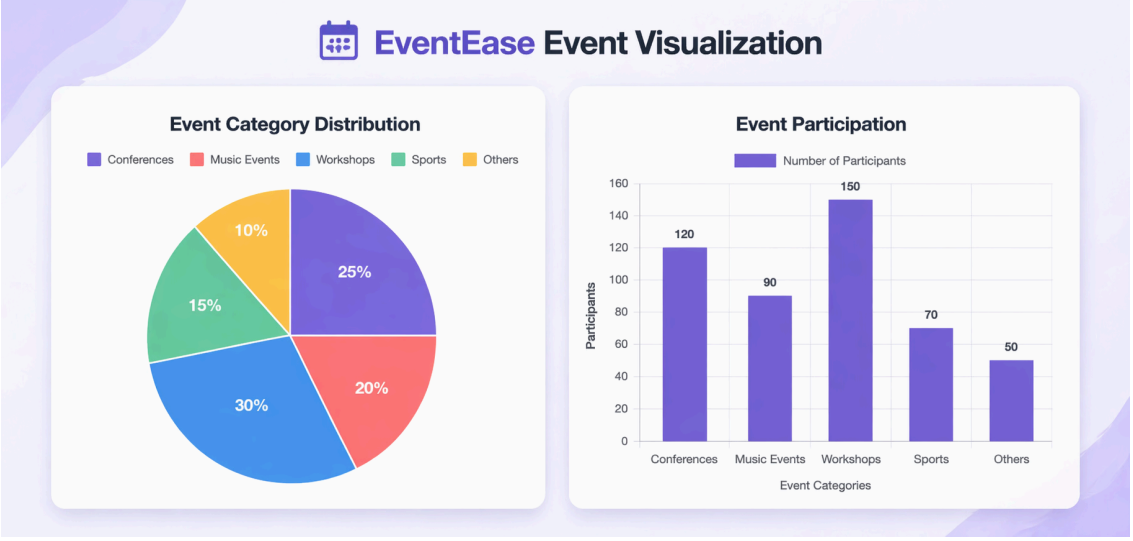
new Chart(document.getElementById('barChart'), {
    type: 'bar',
    data: barData,
    options: {
        responsive: true,
        maintainAspectRatio: false
    }
```

```
});
```

Refer to index.html and script.js files created using Chart.js and datalabels plugin.

OUTPUT:

- Pie chart showing distribution of event categories
- Bar chart showing number of participants in each category



RESULT:

The event management data visualization was successfully created using JavaScript and Chart.js, effectively representing event categories and participation through graphical charts.
